

Infini Phoenix Liposuction

Dr. Hall is focused on the art of body sculpting

We all want to look our best, and while diet and exercise can improve our appearance and make us feel better, sometimes we need a little outside help, and that's where William J. Hall, M.D. comes in.

Dr. Hall owns Infini Phoenix Liposuction, providing his clients with modern tumescent liposuction and Infini Body Sculpture™ techniques to patients who are seeking to re-contour their bodies without spending significant time under the knife or waiting to heal after the procedure. "If a surgeon can truly deliver an improved figure, then just imagine the emotional enhancements that go along with it," he says. "How you feel about yourself when you wake up in the morning and look in the mirror can greatly affect your overall mood and all the interpersonal relationships with those around you."

Dr. Hall was born in a small midwestern town in Iowa. He majored in chemistry as an undergrad and attended the

University of Iowa Medical School. Twenty years ago, he says he envisioned opening a specialized liposculpture clinic. "We are the experts in modern liposculpting techniques, fat transfers, Brazilian butt lifts, breast augmentation with fat, Botox, facial fillers, lip enhancement, and a full aesthetics suite of services, including facials, peels, lasers, and products," he says.

Through hard work and determination, Infini Phoenix Liposuction has become one of the southwest's largest and most comprehensive liposuction practices, providing safe, minimally invasive cosmetic procedures.

Dr. Hall says what's new for 2022 is adding Morpheus 8 to their list of services, an FDA-approved method for sculpting fat under the skin, erasing scars, smoothing, and tightening for a more youthful appearance.

Besides practicing the art of liposculpting, Dr. Hall enjoys educating his peers. "I have a passion for the art and science of fat removal. I have taught and lectured

physicians from all over the world on our special form of fat removal," he shares. When asked what inspires him, Dr. Hall says, "The inner change and confidence that people get from achieving a new figure. That never gets old."

When he's not helping people improve their lives, Dr. Hall likes to travel and has spent several months in Colombia and Cuba and is looking forward to traveling abroad with his wife and children.

He's also involved in many charities, including, Make a Wish and the Arizona Cancer Foundation for Children.

Dr. Hall says he's determined to stay on top of the latest technologies and techniques to provide safe, effective, minimally invasive treatments to help people feel better in their own skin and meet or exceed his clients' expectations.
